Sounds good to me. After my review and some Counsel ground rules, the first thing will be to sit down with Brown or Dudek and fill in the project description. The basic EIR is not too bad so far for a first iteration.

Maggie,

Donna and I discussed this project this morning. The idea is to have you conduct the full technical review of the PEIR and I'll focus on administrative tasks (understand the main PEIR issues, how peir fits into overall project schedule, maintain noticing list, attend meetings, interface with counsel, take care of AB900 related tasks, etc) related to the PEIR review. We will still need to work closely together. With that in mind please ask for additional hours for your task if you think you need them.

Thanks,  
Rob
